

4 STEPS TO MEASURE

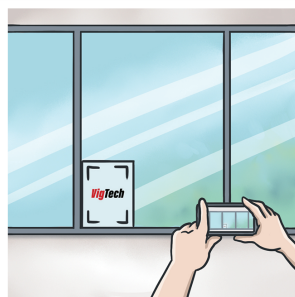

It's that Easy!

1. Download the template image from VigTech Site in an A4 Paper. It can be printed in grayscale format.

2. Place the Template Image at the bottom left corner of the window you wish to measure.

3. Take a Full Image of the Window, including the template Image, then Crop the Image to the Window as closely as possible.

4. Upload the Image back to VigTech Site to get your window measurements
